NOTE: Documentation is still being worked on! Some pages may be incomplete or don't exist yet.

Welcome!

Welcome to my BookStack! This will be a comprehensive repository of all my IT-related documentation, including detailed instructions on how to set up various IT services and documentation on some of my open-source projects.

But this Wiki will be more than just a documentation hub. It's also going to be a resource for the challenges I've faced in the world of IT. I'll document the obstacles I've overcome, the solutions I've discovered, and the workarounds I've devised, all for the benefit of other people who may be facing similar challenges.

Whether you're looking to set up a new service, troubleshoot an issue, or simply expand your IT knowledge, this Wiki is the perfect resource for you. So feel free to browse around and explore, and hopefully, you'll find the answers you're looking for!

Get Started

Shelves

Shelves are just like categories. Here you'll find the general topics of documentation. (for example "Self-Hosting")
Explore by clicking "Shelves" in the top bar or the link above.

Books

These are the individual projects. Inside Books you'll find Chapters and Pages with the documentation itself.
(for example "Setting up Matrix" > "Chapter 1: Installation" > "Updating your System")
Explore by clicking "Books" in the top bar or the link above.

Search

You can also search for specific shelves, books, chapters, or pages in the search bar on the top if you already know what you're looking for.
